

FLOOD HAZARD MAPS

The Engineering Department has made available copies of flood insurance rate maps (FIRM) to allow the public to determine whether a particular property is located within a given flood hazard zone. The maps are located in the Engineering office and may be viewed week days between the hours of 8:30 and 4:30.

Flood Insurance Rate Maps can also be viewed and printed on-line from the FEMA web site at www.fema.gov. Look for the Map Service Center, click on Flood Maps and follow the instructions to access the map you are looking for.
